PALETTE PERFECTION

COOL SUMMER

*How to combine your
Cool Summer
colours*

*Learn about the five
most important
colours in your
palette*

Cool Summer

Cool Summer er den mørkeste af Sommer-sæsonerne og ligger tæt på Vinter.

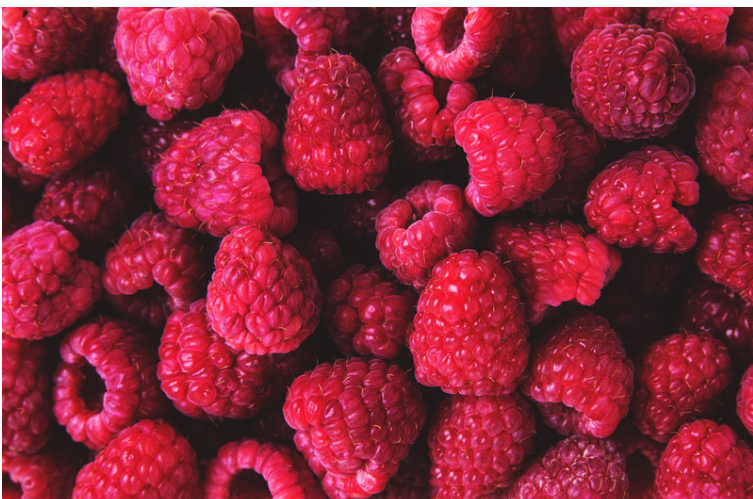

Cool Summer-typer har brug for nogen grad af kontrast og gør sig mindre godt i helt lyse farver eller meget støvede farver.

Hold derfor meget lyse og støvede farver væk fra ansigtet.

Cool Summer is the darkest of the Summer-types and sits close to Winter. Thus, a somewhat higher contrast level is needed.

Typically, very light or dusty colours will make you look a bit faded and therefore they are best avoided close to the face..

Husk dette når du sætter dine farver sammen

Remember this when combining your colours

Både tone-i-tone og kontraster fungerer godt for Cool Summer.

Both tonal looks and contrasting colours work well for Cool Summer.

important tip

Leg med dine looks og prøv forskellige sammensætninger af. Det kan ikke gå helt galt!

Play around and try different combinations. It's risk free!

Tone-i-tone er at sætte to eller flere nuancer af den samme farve sammen. Dette fungerer super godt for de dæmpede sæsoner, Sommer og Efterår.

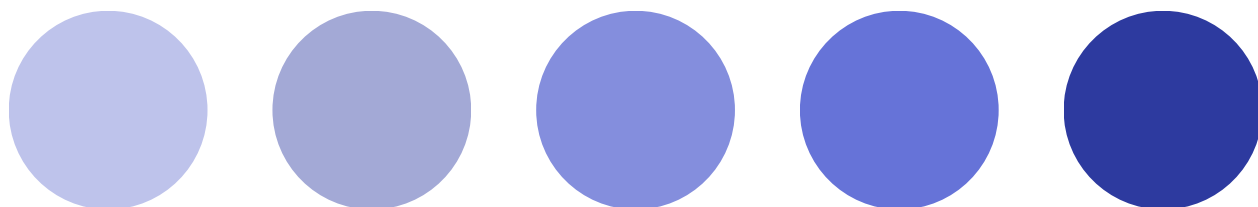

Combining colours tonally means combining two or more colours of the same colour. Tonal looks work extra well for the soft seasons Summer and Autumns.

Sådan bruger du tone-i-tone

How to use tonal combinations

Brug mindst to nuancer af den samme farve. Det er godt at have én mørk nuance, som tilføjer den dybde, du har brug for som Cool Summer.

Use a minimum of two shades of the same colour . It's good to have one dark shade, which will add the depth, you need as a Cool Summer.

Sådan bruger du kontrasterende farver

How to use contrasting colours

Det er bedst, hvis dine kontrasterende farver har lignende valør (mørk/lys), da en sammensætning af meget lyse og mørke farver kan virke lidt skarp til dit dæmpede udseende.

In order to best complement your muted appearance, combine contrasting colours of similar value (dark/light), as sharp contrasts of very light and dark can look overwhelming on you.

På de næste sider kan du læse om de fem vigtigste farver i din palette og få inspiration til hvordan de kan sættes sammen med dine andre farver og neutraler. Du vil hurtigt opdage at mulighederne for nye sammensætninger er uendelige!

On the following pages you can read about the five most important colours in your palette and find inspiration on how to combine them with other colours. You will quickly discover that the possibilities for new combinations are endless!

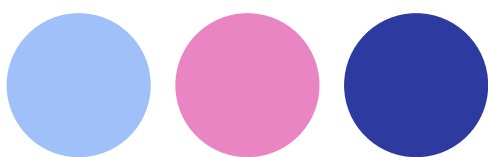

Blå *Blue*

Blå er så at sige grundfarven i hele Sommer-paletten, og selvfølgelig også i Cool Summer-paletten. Dine blå farver kan være alt fra pudderblå til midnatsblå, men de er aldrig skrigende blå (Vinter) eller meget gullige blå (varme blå).

Blue is the cornerstone of the entire Summer palette, and thus of course also in your Cool Summer palette. Your blues are anything from powder blue to midnight blue, but they are never electric blue (Winter) or very yellow based blue (warm blues).

Sådan kan du bruge blå i dine outfits:

Here is how you could use blue in your outfits:

Tone-i-tone + kontrastfarve

Blue as your neutral

Rosa *Pink*

Efter blå kommer rosa - sådan er det i hvert fald for Sommer-typer! Rosa udgør en fantastisk modpol til blå, og tilføjer delikathed og femininitet. Hvis du er bange for at dit look bliver for sødt, så skru op for kontraster eller neutralfarver.

If blue is the basis of Summer, pink is the second layer. These two colours work so well together and pink adds femininity and tenderness. If you don't want to look too sweet, turn up the contrast level or use more neutrals in your outfit.

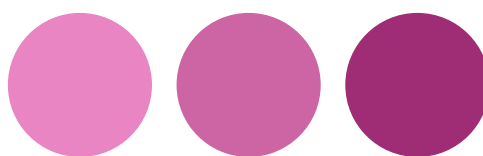

Sådan kan du bruge rosa i dine outfits:

Here is how you could use pink in your outfits:

Rosa som kontrastfarve, bemærk lignende valør i de første to farver.

Pink as contrasting colour, notice the similar value for the first two colours

Contrasting colours + light neutral

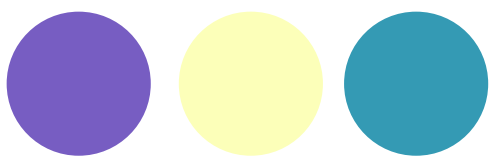

Lilla *Purple*

Har du blandede følelser omkring lilla? Du er ikke den eneste! Faktisk er lilla en virkelig alsidig farve, som klæder de fleste, og især Sommer-typer, da den er en blanding af dine to vigtigste farver.

Got mixed feelings about purple? You're not the only one! But purple is, in fact, an incredibly versatile colour, that looks good on most people. But it looks especially good on you, as it is a mix of your two most important colours.

Sådan kan du bruge lilla i dine outfits:

Here is how you could use purple in your outfits:

Lilla som den dybe farve med to
højtkontrasterende farver (Vinter-inspireret)

*Purple as your deep colour with two high
contrasting colours (inspiration from Winter)*

Sammen med blå og pink
Together with blue and pink

Grøn *Green*

De grønne i din palette har en tydelig blå undertone. Dine grønne går helt fra lys mynte til dyb petroleum, og ser især godt ud i en kombination med lilla.

The greens of the Cool Summer palette have a very distinct blue undertone, They range from pale mint to deep teal and look especially good when combined with purple.

Sådan kan du bruge grøn i dine outfits:

Here is how you could use green in your outfits:

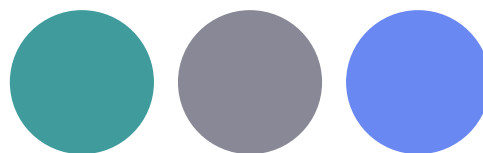

Grøn og lilla sammen er super smukt

Grøn, rosa og mørk neutral
Green, pink and a dark neutral

Skab kontrast mellem grøn og blå
med en neutral farve.
*Add contrast between green and blue
by using a neutral colour*

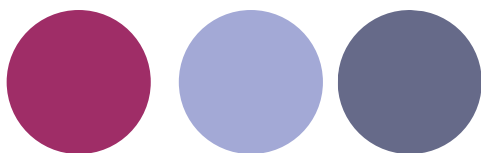

Rød *Red*

Cool Summer's røde har ligeledes en meget tydelig blå undertone og må aldrig blive orange. Tænk på hindbærrets røde farve - det er en klassisk Cool Summer røde.

The Cool Summer reds also have a very clear blue undertone. Anything orange should be avoided at all costs. Think about raspberries - their pink red shade is a classic Cool Summer red.

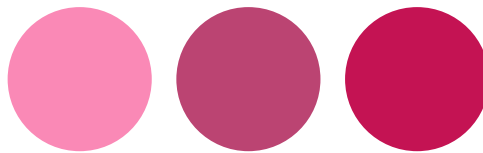

Sådan kan du bruge rød i dine outfits:

Here is how you could use red in your outfits:

Rød sammen med to slags grå ser meget elegant ud

Red with tonal grey looks very elegant.
